Title of the invention:

W/O COSMETIC

Publication date (Kokai): March 28, 2000

Application No.: 10-265280

Filing date: September 18, 1998

Applicant: NONOGAWA SHOJI KK

[Abstract]

[Problem to be Solved]

To provide a water-in-oil emulsion type cosmetic comprising a silicone-based surfactant, silicone oil, a polyhydric alcohol, and salts in a specific amount.

[Solution]

The present invention is a cosmetic having a remarkably improved stability and feeling of use of a water-in-oil emulsion by blending a silicone-based surfactant, silicone oil, a polyhydric alcohol, and 5 to 20 wt% of salts.

[0038]

Example 6: Sunscreen cream

Formulation	Blending amount
1. Dimethylpolysiloxane	25.0 parts
2. Methyl phenyl polysiloxane	15.0
3. Polyoxypropylene and methylpolysiloxane copolymer	6.0
4. 2-Ethylhexyl p-methoxycinnamate	6.0
5. Particulate titanium oxide	5.0

| 6. Fragrance | reasonable amount |
| 7. Glycerin | 25.0 |
| 8. Sodium succinate | 10.0 |
| 9. The balance of purified water to obtain the total amount of 100. | |

[0039]

Production method: Components 1 to 4 and 6 were mixed while stirring, then, Component 5 was uniformly dispersed therein using a homogenizer. Next, Components 7 to 9 were added, and stirred until the mixture became uniform. Using a homogenizer of a high shear force was better.
